

# Conservation Stewardship Program

## for Forestland Managers

**Have you ever  
looked across  
your land  
and thought  
about some  
operational  
management  
goals you  
would like to  
take to the  
next level?  
Maybe we can  
help.**

No one knows more about your land than you do, and no one knows more about conservation than we do. Together we can develop a plan tailored to your operation and your goals to help you increase productivity and protect the value of your land.

The Conservation Stewardship Program (CSP) offers an opportunity for forestland managers to enhance their agricultural operations while adopting conservation activities that can improve crop quality, improve soil health,

and improve water quality. CSP can help you plan and implement conservation practices and enhancements that address natural resource concerns on your operation.

### What's New?

Forestland managers continue to benefit from all the CSP has to offer. There are a number of enhancements for forest production. Examples of enhancement options available to forestland managers include prescribed burning, precision pesticide application and wildlife habitat management.

The new CSP provides adaptive management options to better respond to market and weather conditions, allowing participants to choose enhancements, or bundles of enhancements, that best fit their unique circumstances.

### Is CSP for You?

CSP helps you build on your existing conservation efforts while strengthening your operation. Whether you are looking to improve tree stands, suppress weeds, or develop wildlife habitat, we can custom design a CSP plan to help you meet those goals. We can help you schedule timely planting of pollinator plants, implement grazing management to improve wildlife or develop forest riparian areas. If you are already taking steps to improve the condition of the land, chances are CSP can help you find new ways to meet your goals. CSP contracts are for five years, with the option to renew for another five years.

### Types of Assistance

NRCS provides free technical assistance to agricultural producers. To participate in CSP and receive financial assistance, producers must control or own the land and be in compliance with highly erodible land and wetland conservation requirements, and have current farm records with USDA Farm Service Agency. CSP for forest management is for non-industrial forestland owners. Learn more at [www.nrcs.usda.gov/farmbill](http://www.nrcs.usda.gov/farmbill).

### The Next Step

To learn more about CSP opportunities, producers should contact their local USDA service center and set up an appointment with NRCS staff. A [Local Service Center Directory](http://www.nrcs.usda.gov) is available online at [www.nrcs.usda.gov](http://www.nrcs.usda.gov), then click "Contact Us." You can also visit our CSP page online at [www.nrcs.usda.gov/CSP](http://www.nrcs.usda.gov/CSP).

## CSP Enhancements to Assist Forestland Managers

(This is not an exhaustive list.)

Forest Stand Improvement	Pest Management	Wildlife and Aquatic Species	Fire Hazard Reduction
<ul style="list-style-type: none"> <li>• Creating Structural Diversity in Dry Western Forests</li> <li>• Facilitating Oak Forest Regeneration</li> <li>• Planting for High Carbon Sequestration Rate</li> <li>• Increase on-site carbon storage</li> <li>• Forest Soil Quality Improvement</li> </ul>	<ul style="list-style-type: none"> <li>• Herbaceous Weed Treatment for Desired Plant Communities</li> <li>• Brush Management to Improve Wildlife Habitat</li> </ul>	<ul style="list-style-type: none"> <li>• Snag, Den Trees, and Coarse woody Debris</li> <li>• Prescribed Burning</li> <li>• Riparian Forest Buffer</li> <li>• Tree Planting for Wildlife Food and Cover</li> <li>• Stream Habitat Improvement Through Placement of Woody Biomass</li> </ul>	<ul style="list-style-type: none"> <li>• Reduce Forest Density Along Roads</li> <li>• Grazed Fuel Break</li> <li>• Reduce Height of the Forest Understory</li> <li>• Biochar Production From Woody Residue</li> </ul>

## FAQ

### Frequently Asked Questions

#### How can I find out if I am eligible?

The best way to determine eligibility is to contact your [local field office](#). You must meet Adjusted Gross Income (AGI) requirements and have a Farm Tract Number with FSA. Land already enrolled in some USDA Farm Bill programs, such as CRP and some easement programs, may not be eligible.

#### Is there a minimum number of acres needed to be enrolled?

No, but entire operation must be enrolled.

#### Is there a minimum contract payment?

Yes, \$1,500 annually.

#### What are “resource concerns?”

NRCS conservation specialists conduct resource inventories on agricultural land to evaluate natural resources including soil, water, air, plant, and animal resource bases to determine their condition. If there

is a cause or threat to that resource, that can result in what we refer to as a resource concern. Examples of resource concerns are erosion, degraded water quality, and plant health.

#### What are “enhancements?”

Enhancements are management activities that go above and beyond the minimum practice requirements helping the producer achieve a higher level of conservation.

#### What are “bundles?”

Bundles are suites of conservation enhancements designed to address

multiple resource concerns. Bundle options are offered at a higher payment rate.

#### Do I have options to pick the enhancements that are best suited for my operation?

Yes. The variety of CSP practices that are offered give you a lot of freedom to select enhancements that help you meet your management goals.
